

18k Gold Egg Commission

This piece won the MJSA Vision Award, First Prize for Custom Design
To create a retirement gift for the CEO of an Investment firm was the commission.
The "Nest Egg" was the theme. This was created using the ancient old raising technique of taking
a flat sheet of metal and hammering into a hollowware form.
I suggested the sculptures that were mementos of his life.
Including Mt. Katahdin that I carved out of dental wax and cast, animals,
ruler and airline peanuts created with cad design and cast,
fabricated numbers and little oval sculpted eggs
that all went into a silk purse inside the egg.
